

ZWIESEL KRISTALLGLAS

OUR CERTIFIED ENVIRONMENTAL MANAGEMENT SYSTEM.

ZWIESEL KRISTALLGLAS actively strives to protect the environment. To achieve our objective of placing the smallest possible burden on the environment, we consume as few natural resources as possible and we make optimal use of energy when we manufacture our products.

We live up to this responsibility and continually optimize our in-house processes with the certified ISO 14001:2004 environmental management system.

The goal of these efforts is a holistic and sustainable ecological balance sheet for all our processes and products. From an independent institute, we have already received for our **Tritan®** set of crystal glasses an ecological profile and a carbon footprint, which we further reduce in our daily process.

Sustainably produced
for pure pleasure.

THE PERFECT GLASS: TRITAN® CRYSTAL GLASS

TRITAN® CRYSTAL GLASS THE GLASS WITH AN ECOLOGICAL PROFILE.

Perfect form and radiant gleam: these attributes make glass series from SCHOTT ZWIESEL truly special. The patented **Tritan®** collections of crystal glassware combine all the characteristics needed for perfect enjoyment: Functional design, natural materials and long-lasting brilliance. With **Tritan®** crystal glass, you enjoy beverages from a pure and gleaming glass. Together with the TÜV Rheinland (technical inspection agency of the Rhineland), we continually strive to improve this glassware from an ecological standpoint.
