

GASTRO RACK SYSTEMS

600 x 400

Gastro rack systems for all needs

»The innovative FRIES rack system sets the standard.«

The needs of the hotel, restaurant and catering industry continually grow, and ever more products are on the market. That is the case for glasses, plates, trays and other pieces that have to be washed.

Whatever your needs may be, we definitely have the right rack for you.

Advantages of the FRIES rack systems

Clixrack 600 x 400

CLIX and it's ready!

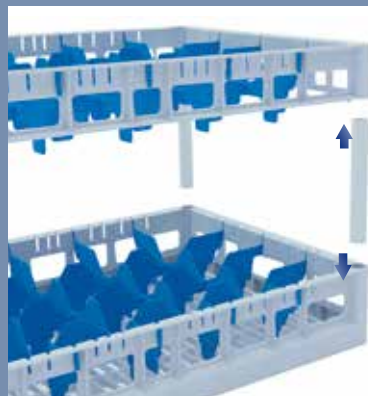

Simple assembly without tools, available in 10 standard heights from 73 to 260 mm.

Customrack 600 x 400

A rack that takes the measure of every glass!

The height of the rack can be precisely adjusted and customized to the height of the glasses.

Less glass breakage and open design

The open rack design ensures water access for a better washing result. Also the glasses dry more quickly. At the same time, the glasses are optimally protected, and the racks can be easily stacked.

Rack systems
600 x 400
All the advantages
of the rack systems:
www.fries-kt.com

Lightweight and ergonomic

The edges are rounded, and the racks can be easily and comfortably held with the side handles. The racks are lightweight, and their contents can be easily checked.

Duplex bottom

Two bottom levels: the rack's upper bottom holds the items being washed, while its lower bottom serves as a cross piece, ensuring better stability during transport. Less sagging, fewer unwashed spots (narrower webbing) and no damage to the contents from transport hooks.

Choosing the right rack

Extra Service: Choosing the right rack with the FRIES measuring chart

You can easily find the right type of rack with the help of the FRIES measuring chart. The chart makes it easy to choose the correct compartment size and rack height.

Measuring chart

Colour coding and branding

The coloured compartments can be combined with six different frame colours, making it easy to place glasses in the right rack.

You can also individually design and label your racks by **hot foil embossing** your lettering or logo.

Coding clips in different colours serve as another way to differentiate your glass racks, which can also be embossed.

Other advantages at a glance

- » sturdy and long-lasting
- » stackable
- » polypropylen as approved food compliant material
- » easy to grasp the bottom of glasses when removing them

Efficient Wash Design (EWD)

This patented technology ensures the targeted circulation of water over and around the problem zones – the rims of glasses and plates in the first and last row.

Bright ideas ...
... set brilliant standards

Clixrack 600 x 400 glass rack the flexible standard

»The rack for your glasses in standard sizes. The ideal solution for transporting, storing and washing the most common types of glasses.«

Our racks can be adjusted to fit your glasses through the use of different Clix extenders, providing a high degree of flexibility. You can easily assemble the racks yourself.

Clixrack 600 x 400 at a glance

- »Efficient Wash Design (EWD)
- » stackable
- » lightweight
- » convertible
- » easy checking of rack contents
- » colour-coded compartments
- » good carrying comfort

The Clixrack System

Ingeniously simple – „clix“ and it's ready. The extenders are available in different sizes and serve as a vertical link between the base rack and top frame.

Compartment size 179 x 109 mm

A rack customized to your glass!

Customrack 600 x 400 glass rack custom-made for your glasses

»The customized rack. The made-to-order solution for safely storing, transporting and washing all of your glasses.«

The modular construction of the glass racks in combination with the different colours of the components makes these racks an indispensable part of a modern tableware management system. The design brings current operating costs under control and minimizes labour requirements as the use of resources such as detergent and energy.
