

HOT & FRESH

Best in its class.

*Induction
Compatible*

The new WMF HOT & FRESH works perfectly with induction heating or with any other commonly used heat source. The lid is clear glass, so it doesn't just look good, it allows an excellent view of the food as well. Heat-resistant handles and catering-grade materials help keep workflows progressing smoothly.

WMF CHANGE Chafing Dishes

Silver plated version available

Handle without care.

With thermal insulated handles and fully retractable lids the Change Chafing Dish is a must have in any Hospitality Operation. With its integral condensation return technology, water marks on the table are now a thing of the past. The lids swing outside the pivot point around the fuel can holder (or hot plate) and pass completely underneath the canisters making the dishes accessible from all sides.

Opens at the lightest touch.

A model of ergonomics in practice, a special cable guide allows the lid to open easily even when an electric heating element is in use. Smooth-acting, stepless brakes keep the movement of the lid optimally slow. For totally convenient opening, closing and stopping. All models, except the Manhattan, are stackable to save space.

Form follows food.

Your culinary concept staged to perfection.

WMF Quadro is deliberately understated with its three components: frame, bridge and serving stand. With its distinct, minimalist design for free reign food presentation, to give the perfect culinary experience with ultimate perfection. The set-up: ultimate simplicity and easy handling.

Find the right solution to every buffet – with the 3D Configurator.

The serving stand

Allows elegant vertical food presentation. Easy to set up and easy to handle. Can also be equipped with trays in a wood and glass finish.

Frames and consoles in four sizes, stackable.

Label holder plastic, transparent.

Bread basket insert in five sizes

Two heights: frame in height of 8cm or 13cm

Plates in various shapes and three materials.

the LEDlight unit for the light mood you choose.

Light plays an important role in presenting a buffet successfully. The little LEDlight unit conjures up subtle lighting islands on the table to create a really special atmosphere at the buffet.

How does it work? It's simple. The dimmable LEDlight unit, powered by a battery, is placed in the frame and subtly lights from underneath. There is a remote control for easy adjustment of the colour and brightness. Optional accessories: LEDlight adapter made of translucent plastic, for another, great lighting effect along the inserts. Available in four sizes to fit the frame.
